Environment

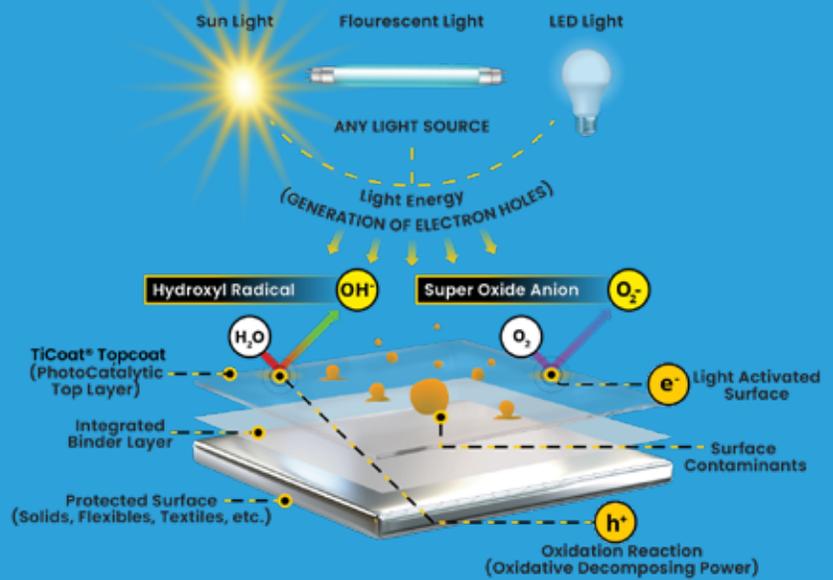

ALWAYS CLEANING. ALL THE TIME.™

THE PROBLEM

Current methods of cleaning are time consuming, ineffective, expensive and toxic.

THE SOLUTION

TiCoat® Surface Protect™. A one step application process, TiCoat® uses light to safely clean and deodorize contaminants that touch its surface. It safely protects surfaces, keeping them cleaner and smelling better.

HOW DOES IT WORK?

- ✓ TiCoat® is a transparent coating flexible enough to be applied to any surface. TiCoat® uses light to break down contaminants that touch its surfaces.
- ✓ Wipe surfaces with a water based green cleaner and let TiCoat® Surface Protect™ clean, reduce organic stains and eliminate odors.

WHY TICOAT®?

✓ FREE OF HARMFUL CHEMICALS

TiCoat® safely protects surfaces, keeping them cleaner, smelling better and protecting anything it is applied to.

✓ CONTINUOUS CLEANING

TiCoat® is a long-lasting, fast-acting, self-cleaning surface coating.

✓ DRIES CLEAR ON ANY SURFACE

Can be applied to both fabric and solid surfaces.
